EDUCATION

National Institute of Applied Science and Technology

Tunis, Tunisia

Software Engineering Degree

Sep. 2022 – Sep 2027

EXPERIENCE

AI Engineer | *Python, FastAPI, CustomerIO, Milvus, Postgres*

November 2024 - Present

Mindbay Technologies

Remote

- Collaborated on an AI-powered mental health platform, implementing RAG pipelines and LLM optimization techniques
- Increased Session 1 user conversion rate by over 50 percent by optimizing AI responses and notification timing
- Automated end-to-end testing using an AI-driven testing system, reducing testing time by over 50%
- Implemented a personalized AI-powered notification and engagement system using Customer.io

Software developer(Intern) | *NestJS*

August 2024

Junior Entreprise INSAT

Tunis , Tunisia

- Used NestJS to build a highly efficient backend for registering members, scheduling interviews and meetings while implementing a secure QR-code based system for attendance

Software and AI engineer (Intern) | *Python , Tensorflow, Flask*

June. 2024 – August 2024

ImageIn Esprit

Tunis, Tunisia

- Developed an AI - based recommendation system for careers and jobs using Python

Web Developer(Intern) | *HTML, CSS, Springboot, MYSQL*

August 2023

Billcom

Sousse, Tunisia

- Developed a web application that manages clients and assigns phone numbers for them : A dashboard for an employee at a phone company

PROJECTS

DrugZello | *Python , Tensorflow*

Jan 2025-Jun-2025

- Engineered a graph neural network to forecast molecular solubility across 75 diverse solvents, increasing prediction accuracy by 12% compared to existing regression models.
- Implemented an explainable AI with dual channels to highlight parts of the molecule that raise/lower the solubility value
- Developed a visualization tool based on a research paper and integrated it into the GNN pipeline

FTHNITY | *PHP, React, Symfony, Git*

March 2024 –April 2024

- Developed a full-stack ridesharing application in PHP, later migrated to Symfony

HACKATHONS & AWARDS

Winner – Unbreaking News 2.0 Hackathon

November 2025

Project: Relib (Colonial Bias Analysis Platform)

- * Designed and built Relib, an AI-powered platform for detecting colonial bias in Wikipedia articles using knowledge graphs, NLP, and cross-lingual semantic analysis
- * Developed bias scoring modules for source provenance, colonial language detection, agency analysis, and actor representation

CERTIFICATIONS

Machine Learning Specialization

Coursera

contains 3 courses delving into various aspects of machine learning

Jun 2024 -Jul 2024

TECHNICAL SKILLS

Programming Languages:Python, C/C++, SQL (Postgres), JavaScript, HTML/CSS

Frameworks:FastAPI, React, Flask, Symfony, Android Studio, Material-UI, NestJS, Milvus

Developer Tools: Git, Docker, VS Code, Visual Studio, PyCharm, IntelliJ, Eclipse, REST APIs , SCRUM, Azure

Interests:Competitive programming, Machine learning, Cybersecurity

Languages:Arabic, French, English, German
